John F. Harper, Ed.D.
Superintendent

To Whom It May Concern:

I am pleased to write this letter of recommendation on behalf of CGLS Architects.

Bartow County is using a CGLS prototype high school that is going to be an outstanding shining star high school in the North Georgia area. The search committee was looking for a high school that had the WOW factor and when we visited CGLS's prototype, it was hands down the choice.

Bob Sussenbach, Becky Tyson, and Mary Reeves are outstanding architects and really know school design and construction. They have been very cooperative and accommodating from the outset of the program planning phase. The team met with our high school administrative and department head staff on numerous occasions in order to "add to, delete, modify and rearrange" the plan to fit our site, our desires, and make the prototype our own.

Mary Reeves is the contract administrator on the team and knows the building inside and out. This is rare in the process. Mary's expertise and attention to detail in reviewing shop drawings and submittals insures to the owner that the plans and specifications are followed. Mary often can anticipate construction issues before an RFI is generated because of her experience.

I would recommend CGLS and this team particularly, for any project your school system may be planning. Please feel free to call for any additional information regarding CGLS.

Sincerely,

Rick Little
Director of Construction and Planning
