

Please consider this a letter of reference for CGLS Architects.

Kevin Price General Contractors Inc had the opportunity to work with the staff at CGLS on the Greene County BOE High School Stadium project.

The project was over budget on bid day.

The owner asked KPGC Inc to consider value engineering ideas. We were able to develop a list of ideas that was submitted to CGLS for review.

The staff at CGLS responded promptly with pros and cons for each of the items. This allowed the owner to make a decision on how to move forward with the project.

As it turned out the project was divided into three phases for cash flow purposes and thus the school system was able to enjoy the use of the stadium for their next season.

KPGC Inc found the working relationship with CGLS to be very effective from a GC Architect perspective.

We received prompt attention to submittals, RFI's and pay requests.

KPGC Inc looks forward to working with CGLS Architects in the near future.

I am happy to answer any further questions if needed.

Best regards

Kevin Price
